

# Tucker Times

Covering Tucker, Northlake, Clarkston and Stone Mountain

Volume 28, No. 8 • AUGUST 2018

## Author with Tucker Connections Wrote Touching Memoir

Writer Carolyne Taylor Winn also designed colorful dust jacket for her book, published by Graphite Press in 2017.

One of the great benefits in my writing for Hometown News is when readers make cordial contact with me. And so it was some time ago when Terry L. Wynne of Tucker wrote asking if I would write a testimonial for a book by her mother, Carolyne Taylor Wynne. In due course her publisher sent me a copy of this charming volume featured in our headline photo. I was delighted to read and review it.

Terry's mother Carolyne Taylor Wynne was a talented woman with a successful career as a corporate accountant for more than 30 years. She also was a volunteer in her community, an avid bridge player and gardener, and a true world traveler. In retirement she took classes in various arts including painting, cooking and ceramics. But it was her creative writing courses that inspired Carolyne to write a charming memoir with a wonderful title, *Through My Eyes*.

## Tucker High School Student Selected for LexisNexis Risk Solutions Code Camp

Tucker High School student James Bunting was among 25 individuals selected from metro Atlanta to participate in Tomorrow's Technologists. The four-week code camp offered by LexisNexis Risk Solutions, a global leader in data, analytics and technology, in collaboration with TAG Education Collaborative and Higher Ground Education, Inc. is part of ongoing initiatives by the organizations to invest in tomorrow's technologists to ensure they have the necessary skills to enter the 21<sup>st</sup> century workforce.

Tucker High School student James Bunting

Designed to expose students to computer science fundamentals, principles, big data and analytics, career planning, technology careers and digital citizenship, the camp introduces participants to four computer coding languages, game/animation creation, website creation, big data simulations and app development.

Held at Georgia Institute of Technology and LexisNexis Risk Solutions, the program began June 25 and concluded July 20 when student teams present their final projects to a panel of LexisNexis Risk Solutions judges.

### Author with Tucker Connections

-- Continued from cover

Carolyne Wynne had an uncanny ability to remember and describe what she saw and experienced in her vibrant life. She grew up as a farm girl in the Low Country of South Carolina and tells her readers about picking cotton, school, her family and friends, holidays, the Depression and a confession with genuine sorrow on "The First Time I Lied."

Some of my favorite parts of Carolyne's memoir are when she came to Atlanta and fell in love with it, living in Druid Hills, enjoying our big city and its wonderful attractions such as the Fox Theatre and Stone Mountain, all the while transforming into a Southern Lady. Entranced with a wider world, she gets a passport and travels throughout Europe, Asia and Africa. (There's a hilarious vignette on "Unique Bathrooms.")

Throughout this down-home, Southern style delight, Carolyne Taylor Wynne affirms with good humor the important things—life, love and family. She's a natural southern writer and left a wonderful kind of valentine for her relations and friends as well as for people who never even knew her. For those who've considered writing their own memoirs, this heartfelt book could inspire them to create their own legacy. ## The Alzheimer's Disease Research Center

# The HEART Project

### What is the HEART Project?

This is an Alzheimer's Disease prevention-based clinical research trial to see if an FDA-approved blood pressure medication has beneficial effects in African-Americans by affecting the flow of blood and the amount of plaque in the brain. You DO NOT need to have high blood pressure.

### You may be eligible to participate if you are:

- African-American
- 45 or older
- Have a family member with Dementia
- Have normal memory & thinking abilities
